

Private placements overtake public bond issuances as the market awaits new regulations

In April 2025, total new bond issuance reached VND 39 trillion, mainly contributed by private placements from banks (VND 21.8 trillion) and real estate companies (VND 12 trillion).

Although private bond issuances in 2025 still comply with the 2019 Securities Law due to transitional provisions, we have observed that 2 new private placement issuers obtained credit ratings and issued secured bonds with payment guarantees. This practice aligns with the requirements of the new Securities Law for private bonds to be distributed to professional individuals from the beginning of 2026.

Only one new public bond was issued in April, amounting to VND 4 trillion (-73% MoM). This issuance has been approved by the State Securities Commission (SSC) in December 2024. We view that public bond issuance activity will remain muted until the new amendment to Decree 155 regulating public issuance is released.
